(54-5 1/2: watch how affiliated groups, people, events, forces
etc., while same time keeping tabs on - monitoring
situation of - their own operatives & personnel, who
are in a sense of "watching" the environment being monitored.

The involves a oblong structure with angles & rounded components. At least part of interior is open, brightly lit, w/ cavernous for schemes. Firstly at present, it is the location sometimes, maybe frequently of a gathering of people. Structure seems to be a center for coordination & control of activities. Sometimes a "watch" is maintain during critical times, which monitors events, situations, trends, etc. in the environment being monitored, but also keeps tabs on groups or "operational elements" of the organization ~~occupies~~ using the structure.
